

KANISHKAA N S

Frontend Developer | UI Developer | React.js Developer

+91 7204666794 | kanishkaans07@gmail.com | linkedin.com/in/kanishkaa-n-s | github.com/kanishkaaNS | kanishkaans.github.io

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries: React.js, JSX, React Hooks (useState, useEffect), Component-Based Architecture, Single Page Applications (SPA)

Styling: Tailwind CSS, Bootstrap, Responsive & Mobile-First Design, Flexbox, CSS Grid

APIs & Cloud: REST API Integration, Async/Await, Fetch API, AWS S3 (Presigned URLs), localStorage

UI/UX & Quality: Figma, Web Accessibility (WCAG 2.1), Cross-Browser Compatibility (Chrome, Firefox, Edge, Safari), Form Validation, Debugging

Tools & Workflow: Git, GitHub, Vite, npm, VS Code, Browser DevTools, Agile/Scrum, Code Review

EXPERIENCE

Frontend Developer Intern — Sysslan IT Solutions

Jun 2026 – Jul 2026

- Developing responsive frontend features for an event ticket booking platform using HTML5, CSS3, and JavaScript (ES6+).
- Implementing interactive UI components — event discovery, theatre selection, and seat booking — with client-side authentication in modular JavaScript.
- Engineering reusable, modular JavaScript components with clean, maintainable code, version-controlled via Git.

Frontend Developer Intern — IBM Internship Program

Jan 2026 – May 2026

- Built the React (Vite, Tailwind CSS) single-page application (SPA) frontend for a cloud storage platform, developing reusable components — file upload, file grid, dialogs/modals — with React Hooks (useState, useEffect) managing upload progress and UI state.
- Integrated the frontend with FastAPI backend REST APIs for authentication, storage quotas, and AWS S3 file operations, handling backend validation errors through frontend error handling and toast notifications.
- Audited components for WCAG 2.1 accessibility and cross-browser compatibility (Chrome, Firefox, Edge), and refactored components after code review to improve prop abstraction and reduce re-renders, meeting Agile/Scrum sprint milestones.

PROJECTS

Cloud Storage System | React, FastAPI, PostgreSQL, AWS S3, Tailwind CSS

- Developed the React (Vite, Tailwind CSS) frontend for a cloud storage application, implementing responsive file upload, listing, and deletion interfaces that integrated with existing REST APIs provided by a FastAPI backend for secure file management.
- Built modular React components including file upload interfaces, responsive file grids, and dialogs using React Hooks to manage upload progress, UI state, and frontend error handling, providing clear user feedback across a responsive, mobile-first interface.

E-Commerce Website – Coorg Spices Emporium | Django, Python, HTML5, CSS3, JavaScript (ES6+), Fetch API

- Developed a Django-based e-commerce application using server-side rendered MVT architecture, featuring a product catalog with categories and variants, django-allauth authentication, Django Templates (DTL), and Django ORM for data management.
- Developed the frontend shopping experience using HTML, CSS, Vanilla JavaScript, and the Fetch API, implementing asynchronous cart updates against internal JSON endpoints, responsive layouts, and interactive user interfaces that delivered a smooth, reload-free shopping experience.

Ovation Tickets | HTML5, CSS3, JavaScript (ES6+), Local Storage API

- Developed the frontend of a responsive event ticket booking platform using HTML5, CSS3, and Vanilla JavaScript, implementing city-based event discovery, theatre and showtime selection, dynamic seat booking, client-side form validation, and a complete booking workflow.
- Implemented client-side authentication and session persistence using Local Storage while building reusable UI components with CSS Grid and Flexbox to deliver a responsive, intuitive, and maintainable booking experience.

EDUCATION

Bachelor of Computer Applications (BCA), Yenepoya (Deemed-to-be) University, Bangalore

2023 – 2026

CGPA: 9.4 / 10

CERTIFICATIONS

- Meta Front-End Developer Professional Certificate – Meta (Coursera)
- UI Design for Web Developers – Scrimba (Coursera)
- Version Control with Git – Atlassian (Coursera)
